*Election/Restriction*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 7-10 and 12-13, drawn to a nucleic acid, a vector, a cell, classified in Class 435, subclass 320.1.

II. Claim 11, drawn to a protein, classified in Class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons.

The products of inventions I and II, are distinct each from the other, because they are drawn to products having materially different structures and functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classifications and recognized divergent subject matter, and the search required for any one of inventions I-II is not required for any other invention I-II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
